

Building our Green Networks

Legend

-  Hydrological Network: Rivers, man-made water infrastructure, wetlands and waterbodies.
-  Transformed (42%): Degraded natural land, non-vegetated, plantations, urban trees, urban grassland, cultivated land, cattle camps, mines, sports and recreation, smallholdings and old lands
-  Untransformed (43%): Dense trees, bush, woodlands, grasslands, natural bare rock and rock-grass matrix
-  Urban (15%): All built-up areas
